

Trusted, tech-enabled partnerships that expand benefits choice without driving costs

IMPROVE MY BENEFITS.

“**Improve my benefits**” is the second-most common answer employees give when asked what single change would keep them in their current job. Only “raise my salary” ranks higher. Yet, 66% of employers say they can only afford to spend an additional \$25 or less per employee per year on benefits – and they’re already spending \$1,000+.

Through Empyrean’s robust integrated provider network, both sides can win:

Reduce employer costs

via lower benefits admin setup fees and improved information transfer through secure, streamlined data transmittal and enhanced data integrity.

Expand employee choice

by empowering informed and engaged decision making – connecting them more strongly to their employer, and to benefits’ role in enriching their lives.

Strengthen employee retention

by increasing benefit satisfaction with integrated decision support, enhanced education, and crisp user experience.

Empyrean’s carefully curated group of partners brings together some of the most established, most trusted names in employee benefits and financial protection. Put the providers in our network – along with their **500 years+ of combined expertise** – to work on behalf of your organization and employees and integrate offerings that improve their health, wealth, and life.
